# 1. Introduction

The new EUMUDA is the European Minor Uses Database and is an important tool to solve minor uses issues in the EU. It allows to collect the minor uses needs from Member States, to follow-up on these needs and to manage all projects. It also provides information on crop acreages in the EU. This database plays a key role in finding chemical/non-chemical solutions for minor uses gaps, within an Integrated Pest Management framework.

The new EUMUDA supports the activities of the Commodity Expert Groups (CEG) with a more detailed follow up of each project. A lot of the information can be entered with selective lists (drop down menus) and the fields for the intended uses (GAP-table) are similar to that used in the Plant Protection Products Application Management System (PPPAMS) as developed by the EU, for better exchange of information.

EUMUDA provides the following information:

- A compiled list of minor uses needs from Member States
- A list of projects and individual projects
- A table of national crop acreages
- References lists on minor uses in different Member States

Most information in EUMUDA is publicly available. This information concerns the table of needs, table of crop acreages, list of work programmes (excluding name of active substances). For individual projects, restricted access applies.

## 1.1 Users types of EUMUDA

Some information mentioned in the list of projects (name of active substance) and individual projects is considered confidential business information for crop protection companies.

In addition, EUMUDA is a participative platform that requires input from stakeholders. However, only relevant stakeholders can provide and modify information.

For these reasons, the MUCF has defined users type of EUMUDA and rules for access rights and confidentiality. Access rights are granted to users depending on their type and the concerned area in EUMUDA. These rules are described in a separate document available on EUMUDA [https://eumuda.minoruses.eu/media/files/Rules\\_confidentiality\\_and\\_access\\_rights\\_EUMUDA.pdf](https://eumuda.minoruses.eu/media/files/Rules_confidentiality_and_access_rights_EUMUDA.pdf)

The MUCF is working on implementing these rules in EUMUDA.

The user types of EUMUDA are:

- General public,
- National Minor Uses Contact Points,
- governmental representatives,
- CEG (co)-Chairs,
- CEG project leader,
- applicants/authorisation holders,
- growers' associations,
- research institutes,
- laboratories,
- the MUCF.

## 1.2 Why and how to login in EUMUDA?

Users need a login account to get access to restricted parts of EUMUDA. This to add/modify information in the table of minor uses needs and the national crop acreages, or read or add/modify information related to the projects.

The login account allows to grant rights to the users. These rights depend on the type of user and the concerned area of EUMUDA.

Users can get access rights to individual projects when the project leader adds contact details of project members in the project, in the appropriate user category.

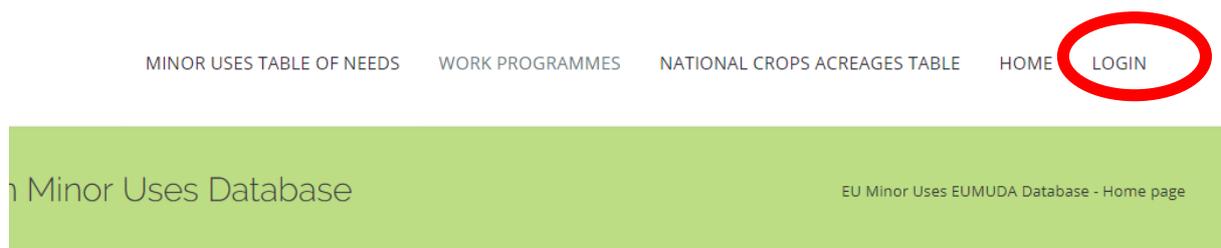

The MUCF manages the login accounts of EUMUDA.

A login account is composed of an email address (identifier) and password.

Existing users of EUMUDA have their email address registered in EUMUDA with corresponding granted rights. They can use the same login account as in the former EUMUDA.

New users of EUMUDA can contact the MUCF ([contact@minoruses.eu](mailto:contact@minoruses.eu)) indicating the organisation they are working for, to obtain a login identifier and password.

To login, click on the button 'login' in the top right corner of EUMUDA. The login button is present whatever the page of EUMUDA.

### WELCOME to the European Union Minor Uses Database EUMUDA !

EUMUDA is an important tool to collect the minor use needs from Member States, to follow-up on these needs and to manage all projects.

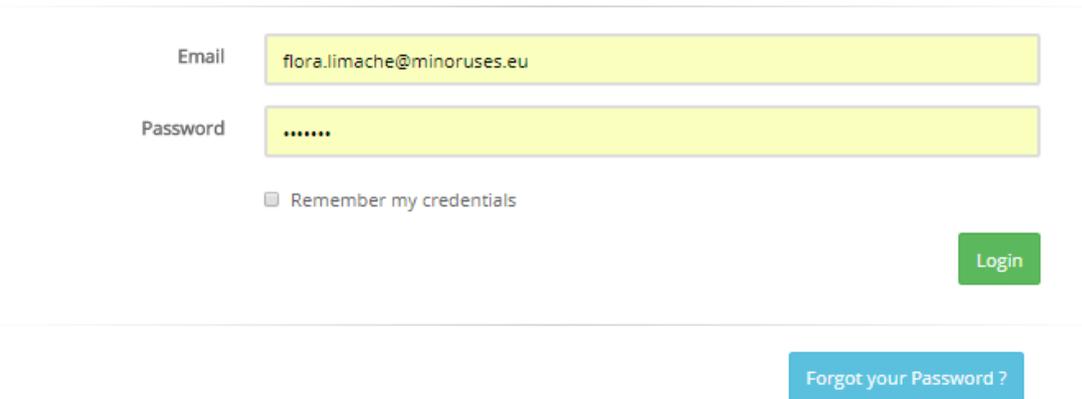

This database plays a key role in finding chemical and/or non-chemical solutions for minor uses gaps, within an Integrated Pest Manager framework.

#### What information can I find in EUMUDA ?

- A compiled list of minor uses needs from Member States. The current list is sourced from the [C-IPM Eranet](#) .
- An overview of ongoing projects and their status.
- A table of crop acreages.
- Reference lists of what are considered "minor uses" in different Member States (by clicking on the map below for Countries who

You will then see a login page where you can enter your email address and password.

## Log in to EUMUDA - European Minor Uses Database

Email

Password

Remember my credentials

Login

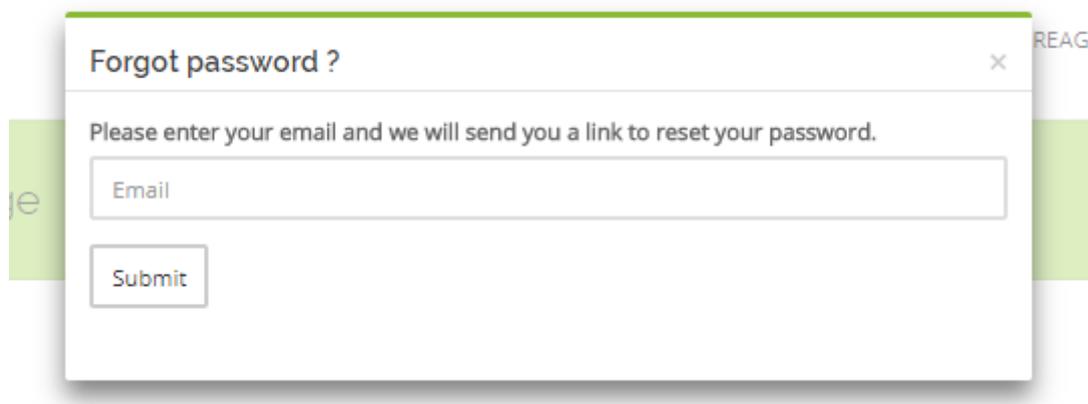

Forgot your Password ?

You can tick the field 'Remember my credentials' for future connections.

**Do not forget to click on the button 'Login'.**

In case you forgot your password, click on the button 'Forgot your password?'

You will then see a box appearing where you can enter your email. The MUCF will send you a link to reset your password.

Forgot password ?

Please enter your email and we will send you a link to reset your password.

Email

Submit

Make sure to login first when you need to access to restricted parts of EUMUDA!

## 2. Homepage

The homepage provides an introduction on EUMUDA and a map of the European region.

## WELCOME to the European Union Minor Uses Database EUMUDA !

EUMUDA is an important tool to collect the minor use needs from Member States, to follow-up on these needs and to manage all projects.

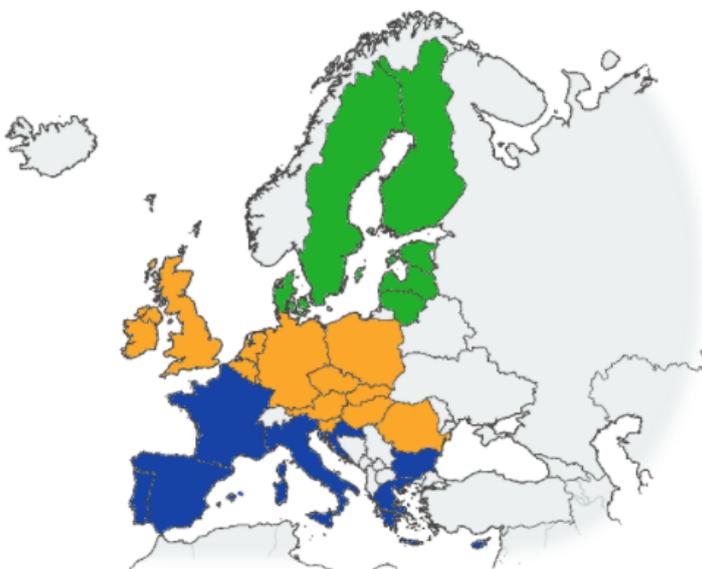

This database plays a key role in finding chemical and/or non-chemical solutions for minor uses gaps, within an Integrated Pest Management framework.

### What information can I find in EUMUDA ?

- A compiled list of minor uses needs from Member States. The current list is sourced from the [C-IPM Eranet](#).
- An overview of ongoing projects and their status.
- A table of crop acreages.
- Reference lists of what are considered "minor uses" in different Member States (by clicking on the map below for Countries who have published information).

Not all information on individual projects is accessible for everybody. The MUCF is working on rules for access rights and confidentiality .

Currently, the MUCF and Member States are in the process to populate EUMUDA with more data.

When you click on a Member State in the map, you will access to the information corresponding to the Member State. This information consists of a national list of what are considered “minor uses” and/or a list of minor crops, and useful national minor uses links, e.g. authority website, minor uses organisation website, or PPP database.

From the map, you can also easily access to the information available from other Member States.

Or you can access to this information scrolling down on the page. This will show you the following information:

#### Austria

Useful Information	Minor Uses Useful links
List of reference of Minor / Major Uses	Landwirtschaftskammer Österreich Austrian Chamber of Agriculture

#### Belgium

Useful Information	Minor Uses Useful links
List of minor crops	Phytoweb - Plant Protection Products and Fertilizers Phytoweb - Database of plant protection products - research in French Phytoweb - Database of plant protection products - research in Dutch

#### France

Useful Information	Minor Uses Useful links
List of reference of Minor / Major Uses - Catalogue des Usages	French Ministry of Agriculture

#### Germany

Useful Information	Minor Uses Useful links
List of reference of Minor / Major Uses	Julius Kühn Institut - Bundesforschungsinstitut für Kulturpflanzen Federal Research Centre for Cultivated Plants
List of Minor / Major Crops	

#### Netherlands

Useful Information	Minor Uses Useful links
List of Minor Crops	Expert Centre for Speciality Crops Board for the Authorisation of Plant Protection Products and Biocides - Minor Uses Web page

### 3. Minor uses table of needs

#### 3.1 What is the minor use table of needs?

The table of needs of EUMUDA is a compiled list of minor uses needs that have been identified by EU Member States (and some non-EU countries).

A minor use need is defined by the crop and the pest, the area of use, and the country. A case is any unsolved problem in the minor uses table of needs.

Each line of the table corresponds to a minor use need. In each line, the frequency and the status of the minor use need are also indicated in columns. The frequency is very useful to evaluate the importance of the need in the European region. It is planned to add a column for priority. This parameter is very useful to know the urgency of needs in Member States. The priority column is currently present in the table of the GMUS survey.

There is also a column for comments.

## Minor Uses Table of Needs

Case id	Crop code	Crop	Pest code	Pest	Frequency	Minor/major crop	Minor/major pest	Year	Area of use	Function	Member State	Latest status	Comments
1	Z00045	vegetables	CAVAAE	Cavariella aegopodii	1	minor crop	minor pest	2016	Outdoor or field use	insecticide	Netherlands	Case refused by MUCF	
2	DAUCS	carrots	-	aphids	1			2016	Outdoor or field use	insecticide	Netherlands	Case refused by MUCF	
3	DAUCS	carrots	CAVAAE	Carrot aphid	1			2016	Outdoor or field use	insecticide	Netherlands	Case unsuccessfully completed	
4	LACSA	lettuce	SCLPST	Downy mildew	1			2016	Outdoor or field use	fungicide	Estonia	Case successfully	

A number is allocated to each case. The cases are displayed by ascending numbering order.

The crop and pest are preferably defined at species level, and EPPO codes are used. EPPO Codes are constructed with combinations of five to six letters, and whenever possible, they are mnemonic abbreviations of the scientific names. For example, the code of apple *Malus domestica* is MABSD and of the whitefly *Bemisia tabaci* is BEMITA. EPPO codes are sourced from EPPO Global Database: <https://gd.eppo.int/>.

In addition, to better define the minor use, there is the possibility to indicate whether the crop is minor or major and whether the pest is minor or major.

The year corresponds to the year of introducing the need by the Member State (and not the year the pest was discovered in a Member State).

The table below displays the description, source of information and possible entries where relevant, for the columns:

Column	Description	Source of information	Possible entries
Case id	Identification number of the case	Automatically from EUMUDA	Number starting from 1
Crop code	EPPO code for crops, at species level	EPPO global database	-
Crop	common name of crop, in English	EPPO global database	-
Pest code	EPPO code for pest, at species level	EPPO global database	-
Pest	the common name of pest, in English	EPPO global database	-
Frequency	Frequency of the need among MS	Automatically from EUMUDA	Number starting from 1
Priority	Priority of the need among MS	MS and MUCF	Number starting from 1

Minor/major crop	The minor or major status of the crop	MS and MUCF	Minor, major or unknown
Minor/major pest	The minor or major status of the pest	MS and MUCF	Minor, major or unknown
Year	Year of identification of the need	MS or CEG (co) Chair	Year yyyy
Area of use	Conditions of use	MS	Greenhouse application, Outdoor or field use, indoor application
Member State	Member State who identified the need nationally	MS	Name of the 28 EU Member States (country code) and EFTA countries (Norway, Switzerland, Iceland and Liechtenstein)
Latest status	Latest status of the need	MS or MUCF	See separate table below
Comments	Any relevant comment (e.g. reason of the needs, for organic production, seed production)	MS or MUCF	Free text

<b>Possible entries for 'Status'</b>	<b>Explanation</b>
Minor use need received by MUCF	
Minor use need validated by MUCF	
Minor use need refused by MUCF	Entry incomplete as not all fields have been completed or no crop or pest has been specified at species level
Database checked by MUCF	
Possible solutions identified	existing authorisation or non-chemical method available in another EU Member State
Information forward to Member State	
No possible solution identified	
Reply from Member State that possible solution cannot be applied	
Reply from Member State that possible solution can be applied	

Case successfully completed	Authorisation granted or solution available
Case successfully completed, but follow up project is recommended	
Case unsuccessfully completed	Authorisation not granted or solution not available
Application for PPP authorisation or registration of a non-chemical method submitted	
PPP authorisation or registration of a non-chemical method process ongoing	
Project proposal to CEGs	

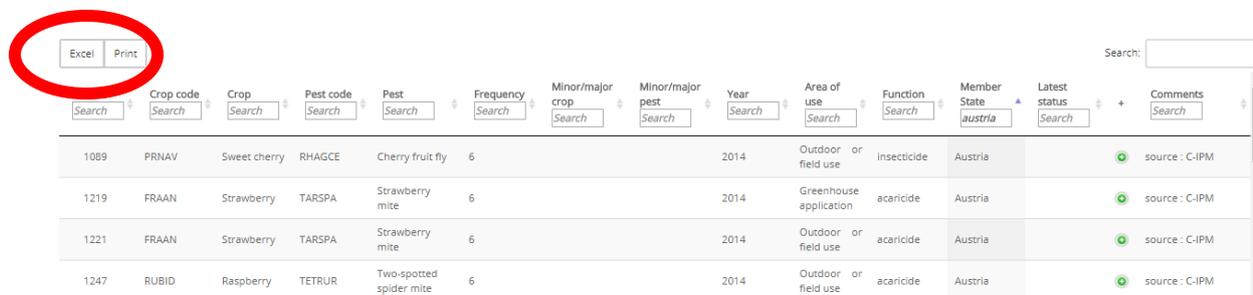

### 3.2 How to search in the table of needs?

It is possible to make searches in the table using the field 'Search' on a specific filter or combining filters. For example, a search can be done for the crop code, country and year at the same time (FRAAN Belgium 2015).

The information can be sorted by ascending or descending order.

The research can be exported through an excel file by clicking on the 'Excel' button on the top left side of the page.

#### Minor Uses Table of Needs

	Crop code	Crop	Pest code	Pest	Frequency	Minor/major crop	Minor/major pest	Year	Area of use	Function	Member State	Latest status	Comments
1089	PRNAV	Sweet cherry	RHAGCE	Cherry fruit fly	6			2014	Outdoor field use	Insecticide	Austria	source : C-IPM	
1219	FRAAN	Strawberry	TARSPA	Strawberry mite	6			2014	Greenhouse application	acaricide	Austria	source : C-IPM	
1221	FRAAN	Strawberry	TARSPA	Strawberry mite	6			2014	Outdoor field use	acaricide	Austria	source : C-IPM	
1247	RUBID	Raspberry	TETRUR	Two-spotted spider mite	6			2014	Outdoor field use	acaricide	Austria	source : C-IPM	

### 3.3 Who can add and modify information?

Only the users 'National Minor Uses Contact Points', CEG (co) Chairs and the MUCF can add and modify minor uses needs.

The National Minor Uses Contact points are representatives of Member States governments and responsible for minor uses nationally. There are at least two contact points per Member States. They can only add and modify information for their own Member State.

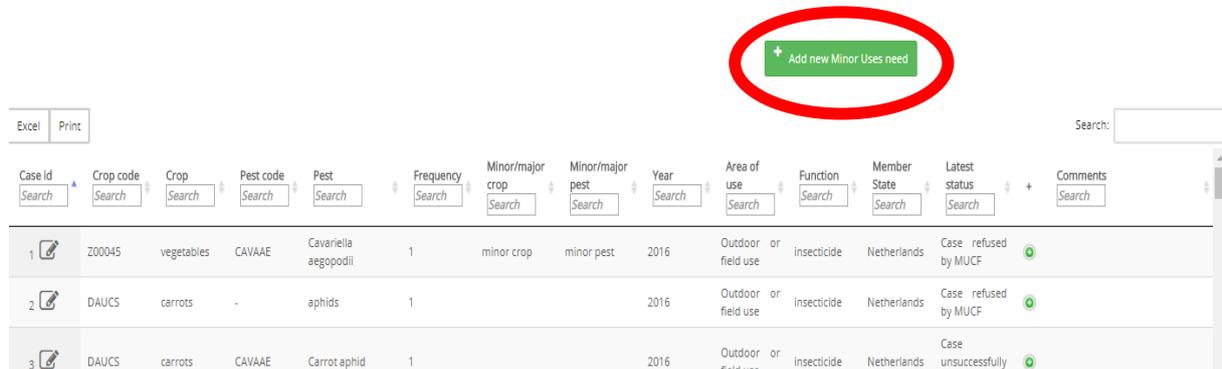

The CEG (co)-Chairs can only add and modify information for their own CEG. CEG (co)-Chairs are not representatives from industry.

### 3.4 How to add and modify information?

To add a minor use need, the users should first login. See point 1.2 in the Introduction of this guide.

Once logged-in, click on the button 'Add new Minor Uses need' on the top right side of the page. The number of the case ('Case id') is automatically allocated by EUMUDA.

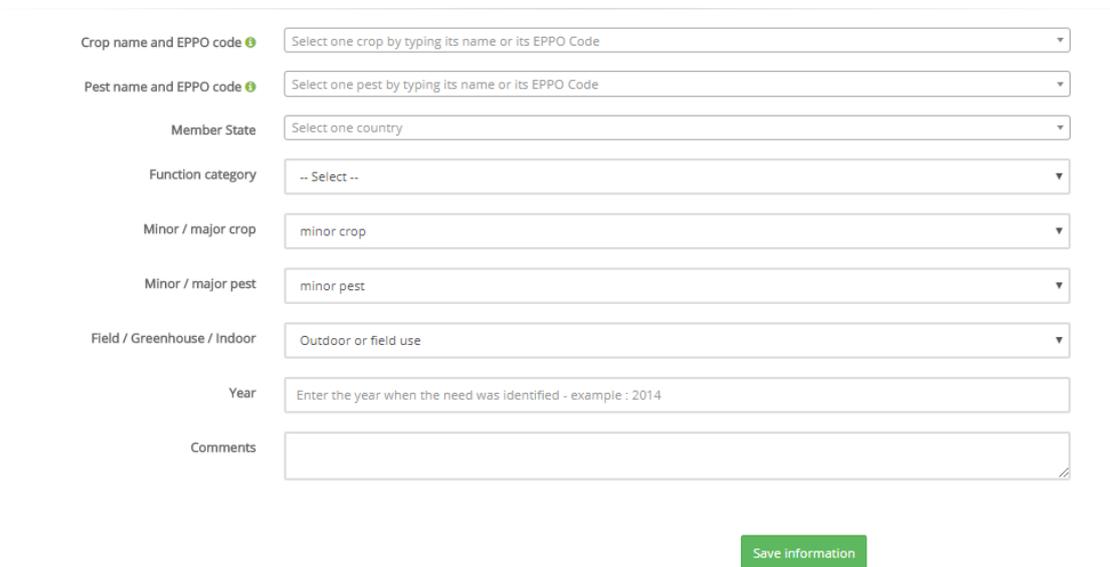

#### Minor Uses Table of Needs

Case id	Crop code	Crop	Pest code	Pest	Frequency	Minor/major crop	Minor/major pest	Year	Area of use	Function	Member State	Latest status	Comments
1	Z00045	vegetables	CAVAAE	Cavariella aegopodii	1	minor crop	minor pest	2016	Outdoor or field use	insecticide	Netherlands	Case refused by MUCF	
2	DAUCS	carrots	-	aphids	1			2016	Outdoor or field use	insecticide	Netherlands	Case refused by MUCF	
3	DAUCS	carrots	CAVAAE	Carrot aphid	1			2016	Outdoor or field use	insecticide	Netherlands	Case unsuccessfully	

Once in the individual need, you will see two parts. The first part is to create or modify the case, the second part is to indicate the status.

#### New case

Crop name and EPPO code  Select one crop by typing its name or its EPPO Code

Pest name and EPPO code  Select one pest by typing its name or its EPPO Code

Member State Select one country

Function category -- Select --

Minor / major crop minor crop

Minor / major pest minor pest

Field / Greenhouse / Indoor Outdoor or field use

Year Enter the year when the need was identified - example : 2014

Comments

#### Pop-up boxes

In individual needs (as well as in individual projects), for some fields you will see boxes popping-up when moving the mouse on the symbol 'i'. These pop-up boxes provide guidance for entering the information.

## New case

Crop name and EPPO code ⓘ	Select one crop by typing its name or its EPPO Code
Pest name and EPPO code ⓘ	Select one pest by typing its name or its EPPO Code
Member State	Select one country
Function category	-- Select --
Minor / major crop	minor crop
Minor / major pest	minor pest
Field / Greenhouse / Indoor	Outdoor or field use
Year	Enter the year when the need was identified - example : 2014
Comments	

### Creating a case

To create a case, it is mandatory to fill the following fields:

- Crop name and EPPO code
- Pest name and EPPO code
- Member State
- Year

#### Field 'Crop name and EPPO code'

Only one crop should be mentioned in this field. The crop should be indicated at species level.

To enter information in this field, start typing the crop latin name or common name or its EPPO code. A menu will then appear automatically where you can search and select the right name and code. The field is directly linked to EPPO global database <https://gd.eppo.int/>.

### Case n. 5

Crop name and EPPO code ⓘ	apple (MABSD)
Pest name and EPPO code ⓘ	appl
Member State	apple (MABSD)
Function category	pineapple (ANHCO)
Minor / major crop	wax-apple (SYZJV)
Minor / major pest	emu apple (KUNPO)
	kei apple (DOVCA)
	minor pest

### Field ‘Pest name and EPPO code’

The principle is the same as for the crop. Only one pest should be mentioned in this field. The pest should be indicated at species level.

To enter information in this field, start typing the pest latin name or common name or its EPPO code. A menu will then appear automatically where you can search and select the right name and code. The field is directly linked to EPPO global database <https://gd.eppo.int/>.

For plant growth regulators, simply type ‘Plant growth regulator’.

### Case n. 5

Crop name and EPPO code	apple (MABSD)
Pest name and EPPO code	Neonectria galligena (NECTGA)
Member State	neoned
Function category	Neonectria lucida (NECTLU)
Minor / major crop	Neonectria rugulosa (RUGORU)
Minor / major pest	Neonectria coronata (THENCO)
	Neonectria ditissima (NECTGA)
	Neonectria galligena (NECTGA)
	Neonectria radicolica (NECTRA)
Field / Greenhouse / Indoor	Outdoor or field use

### Field ‘Member State’

Only one Member State should be mentioned in this field.

Start typing the name of your Member State. A menu will then appear automatically where you can select the Member State. The menu contains all EU Member States plus EFTA countries (Norway, Switzerland, Iceland and Liechtenstein).

### Case n. 5

Crop name and EPPO code	apple (MABSD)
Pest name and EPPO code	Neonectria ditissima (NECTGA)
Member State	un
Function category	Hungary (HU)
Minor / major crop	United Kingdom (UK)

### Field ‘minor/major crop’

Select ‘minor crop’, or ‘major crop’ in the drop-down menu.

### Field ‘minor/major pest’

Select ‘minor pest’, ‘major pest’ or ‘unknown’ in the drop-down menu.

### Field ‘Field/greenhouse/indoor’

Select ‘Outdoor or field use’, ‘Greenhouse application’, ‘Indoor application’ or ‘unknown’ in the drop-down menu.

### Field 'Year'

Type the year of introduction of the need.

### Field 'Comment'

Enter information by typing free text, in English.

**Do not forget to save information by clicking on the button 'Save information'.**

#### New case

Crop name and EPPO code	Select one crop by typing its name or its EPPO Code
Pest name and EPPO code	Select one pest by typing its name or its EPPO Code
Member State	Select one country
Function category	-- Select --
Minor / major crop	minor crop
Minor / major pest	minor pest
Field / Greenhouse / Indoor	Outdoor or field use
Year	Enter the year when the need was identified - example : 2014
Comments	

Save information

### **Entering and modifying a status**

This part displays a history of the different status of the case.

To enter a status, click on the button 'Enter a new status'.

#### Case status

Date	Status	Comment	Source	Actions
2016-11-25	Information forwarded to Member State		MUCF	<a href="#">Edit</a>
2016-11-24	Database checked by MUCF		MUCF	<a href="#">Edit</a>
2016-10-22	Case validated by MUCF	Possible solutions are looked at by MUCF	MUCF	<a href="#">Edit</a>

Enter a new status

You will then see four different fields to fill-in: 'Status date', 'Source', 'Status' and 'Comments'.

## New status

Status date	<input type="text" value="2017-07-24"/>
Source	<input type="text" value="-- Select --"/>
Status	<input type="text" value="-- Select --"/>
Comments	<input type="text"/>

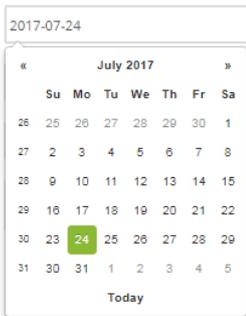

Save information

### Field 'Status date'

Start typing the year, a menu will then automatically appear in a calendar format where you can select the date. You can also enter the date under this format: yyyy-mm-dd.

## New status

Status date	<input type="text" value="2017-07-24"/>
Source	<input type="text" value="-- Select --"/>
Status	<input type="text" value="-- Select --"/>
Comments	<input type="text"/>

The calendar shows the month of July 2017. The days of the week are abbreviated as Su, Mo, Tu, We, Th, Fr, Sa. The date 24 is highlighted in green. The word 'Today' is centered at the bottom of the calendar.

Save information

### Field 'Source'

To enter information, select 'MUCF', 'Member State', or 'CEG (co) Chair' in the drop-down menu.

### Field 'Status'

Select one of the possible status in the drop-down menu.

### Field 'Comments'

Enter information by typing free text, in English.

**Do not forget to save information by clicking on the button 'Save information'.**

To modify a status, click on the button 'Edit' in the right column 'Actions' in the case history. Then change the field(s) as required, following the same instructions as for adding a status.

## Update status

Status date	<input type="text" value="2016-11-25"/>
Source	<input type="text" value="MUCF"/>
Status	<input type="text" value="Information forwarded to Member State"/>
Comments	<input type="text"/>

[Save information](#)

### Case history

Date	Status	Comment	Source	Actions

2016-10-22	Case validated by MUCF	Possible solutions are looked at by MUCF	MUCF	<a href="#">Edit</a>

**Do not forget to save information by clicking on the button ‘Save information’.**

## 4. Projects

### 4.1 List of projects

As the list of projects is publicly available, you do not need to log-in to access it.

#### 4.1.1 What is the list of projects?

The list of projects is a table displaying a compilation of the individual projects run under the CEGs.

#### List of Projects

Project id	CEG	Leading MS	Crop name and EPPO code	Crop Group	Extrapolation crops	Pest name and EPPO code	Area of use (FGI)	Date	Status
122	Hops	Germany	Hop (HUMLU Humulus lupulus)			OTIOLI Otiorynchus ligustici PSVIAT Psylliodes attenuata	F	2016-04-26	
123	Fruits and Vegetables	Germany	Strawberry (FRAAN Fragaria x ananassa)	Small fruit		CHTSFR Chaetosiphon fragaefolii MACFSR Sitobion fragariae MYZUAS Myzus ascalonicus APHIRB Aphis ruborum	G	2016-02-01	Project successfully completed
125	Fruits and Vegetables	Netherlands	Black currant (RIBNI Ribes nigrum) Red and white currants (RIBRU Ribes rubrum) Raspberry (RUBID Rubus idaeus) Bilberry (VACMY Vaccinium myrtillus)	Small fruit		DROSSP Drosophila sp. THRITB Thrips tabaci	F G	2014-02-17	
127	Hops	Germany	Hop (HUMLU Humulus lupulus)			POAAN Poa annua	F	2017-03-29	

A number is allocated to each project. The projects are displayed by ascending numbering order.

The crop and pest are indicated in the same way as for minor uses needs: preferably at species level, and common/latin names and EPPO codes are used. The area of use corresponds to the same column as in the table of needs.

The concerned CEG and Member State leading the project are mentioned. Other important information for the project is the crop group and extrapolation crops. The crop groups used are according to EPPO non-taxonomic crop grouping, developed to describe uses of plant protection products. Extrapolation crops used to describe the project are determined following extrapolation rules for efficacy, as in the end, the plant protection product will be authorised based on uses which are justified from an agronomic point of view. For efficacy, extrapolation rules are according to EPPO Minor Uses extrapolation tables [https://www.eppo.int/PPPRODUCTS/minor\\_uses/minor\\_uses.htm](https://www.eppo.int/PPPRODUCTS/minor_uses/minor_uses.htm).

For residues, extrapolation rules are also used, but within individual projects. These rules follow EU guidance document SANCO 7525/VI/95 ‘Guidelines on comparability, extrapolation, group tolerances and data requirements for setting MRLs’.

The date corresponds to the date of the start of the project.

The table below displays the description, source of information and possible entries where relevant, for the columns:

Column	Description	Source of information	Possible entries
Project id	Identification number of the project	Automatically from EUMUDA	Number starting from 122
CEG	Name of the Commodity Expert Group concerned by the project	MUCF	Fruits and vegetables, Hops, Mushrooms, Ornamentals, Rice, Seeds, Tobacco
Leading MS	Member State leading the project	MS	Name of the 28 EU Member States and EFTA countries (Norway, Switzerland, Iceland and Liechtenstein)
Crop name and EPPO code	Common name, latin name and EPPO code for crops, at species level	EPPO global database	-
Crop group	Group of the crop according to EPPO non-taxonomic crop grouping	EPPO global database	-
Extrapolation crops	Crops used in the projects, from which efficacy data can be	EPPO	-

	extrapolated for the minor use concerned. Rules for extrapolation are according to EPPO extrapolation tables for minor uses.		
Pest name and EPPO code	Common name, latin name and EPPO code for crops, at species level	EPPO global database	-
Area of use	Conditions of use	Leading MS	F (Outdoor or field use), G (Greenhouse application), I (indoor application)
Date	Date of the start of the project	Leading MS	Date yyyy-mm-dd
Status	Latest status of the project	Leading MS or MUCF	See separate table below

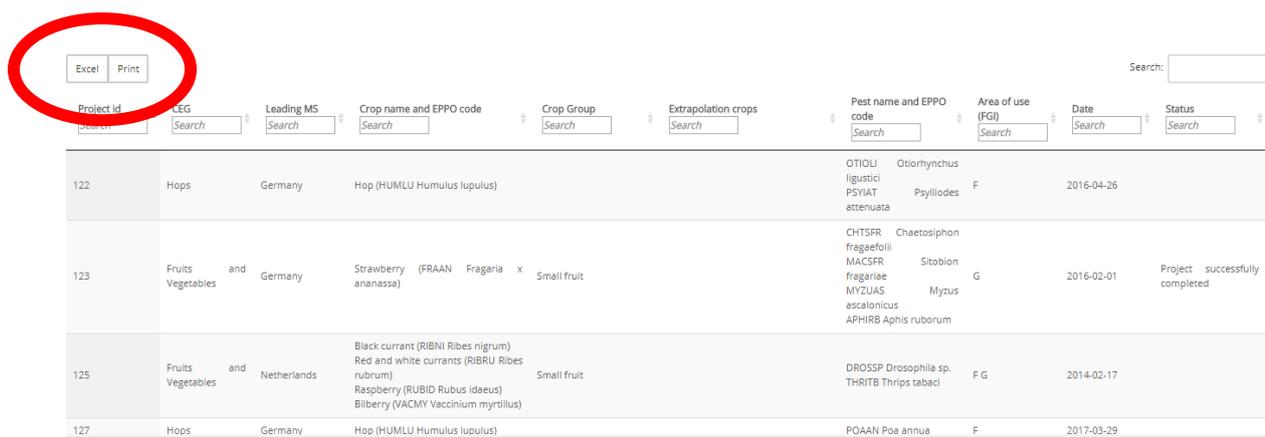

Possible entries for 'Status'	Explanation
Project started	
Project not started by MUCF or CEG	Because there is insufficient information provided
Project ongoing	Data generation
Project terminated before completion	
Project successfully completed	All data available

#### 4.1.2 How to search in the list of projects?

It is possible to make searches in the table with a specific filter on a column or on several columns. The information can be sorted by ascending or descending order.

The search can be exported through an excel file by clicking on the 'Excel' button.

## List of Projects

Project id	CEG	Leading MS	Crop name and EPPO code	Crop Group	Extrapolation crops	Pest name and EPPO code	Area of use (FGI)	Date	Status
122		Germany	Hop (HUMLU Humulus lupulus)			OTIOLI Otiorthynchus ligustici PSVIAT Psylliodes attenuata	F	2016-04-26	
123	Fruits and Vegetables	Germany	Strawberry (FRAAN Fragaria x ananassa)	Small fruit		CHTSFR Chaetosiphon fragaefolii MACSFR Sitobion fragariae MYZUAS Myzus escalonicus APHIRB Aphis ruborum	G	2016-02-01	Project successfully completed
125	Fruits and Vegetables	Netherlands	Black currant (RIBNI Ribes nigrum) Red and white currants (RIBRU Ribes rubrum) Raspberry (RUBID Rubus idaeus) Bilberry (VACMY Vaccinium myrtillus)	Small fruit		DROSSP Drosophila sp. THRITB Thrips tabaci	F G	2014-02-17	
127	Hops	Germany	Hop (HUMLU Humulus lupulus)			POAAN Poa annua	F	2017-03-29	

### 4.1.3 Who can add and modify information?

The list of projects is automatically generated by EUMUDA. It cannot be modified itself, but only through the individual projects.

## 4.2 Individual projects

### 4.2.1 What is an individual project?

An individual project corresponds to a case with agreed action(s) taken to solve a minor use need by a CEG. A project is started when data needs to be generated, for residue and/or efficacy. The project -in EUMUDA- ends when the final report on the generated data has been submitted.

The project is always lead by a Member State, represented by a project leader. Member States contributing to the project -financially or in another way- are called 'Member States participating'. Member States who share the same minor uses needs, but do not participate in the project, are called 'Member States interested'.

For each project, there is an agreed project plan providing some basic information on the minor use need, the possible solution, the project, the project leader and parties involved, and clarifying the role of each party participating/involved in the project.

### 4.2.2 Who can read information?

Only the national minor uses contact points, the CEG (co)-Chairs, project leaders and MUCF can read the information for all individual projects. Project members can only read their own project.

Project members can be:

- governmental representatives,
- applicants/ authorization holders,
- growers' associations,
- research institutes.

The general public cannot read individual projects.

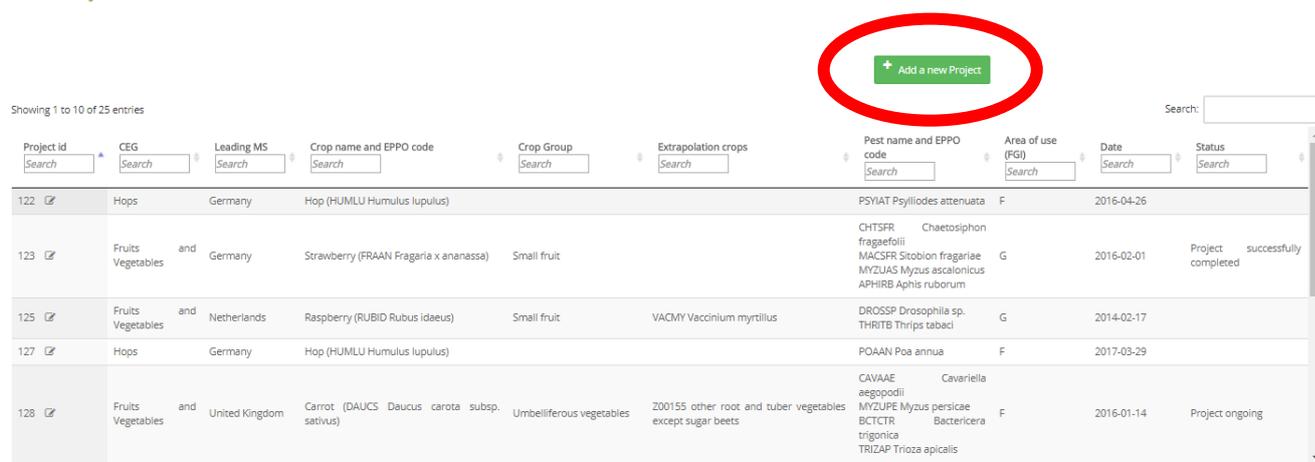

### 4.2.3 Who can add and modify information?

Only the project leader and the MUCF can add and modify information in the project. There is only one project leader per project (no deputy).

### 4.2.4 How to create a project?

To add a project, the users should first login. See point 1.2 in the Introduction of this guide. Once logged-in, click on the button 'Add a new project' on the top right side of the page.

#### List of Projects

Showing 1 to 10 of 25 entries

Search:

Project id	CEG	Leading MS	Crop name and EPPO code	Crop Group	Extrapolation crops	Pest name and EPPO code	Area of use (FGL)	Date	Status
122	Hops	Germany	Hop (HUMLU Humulus lupulus)			PSYIAT Psylliodes attenuata	F	2016-04-26	
123	Fruits and Vegetables	Germany	Strawberry (FRAAN Fragaria x ananassa)	Small fruit		CHTSFR Chaetosiphon fragaefolii MACSFR Sitobion fragariae MYZUAS Myzus ascalonicus APHIRB Aphis ruborum	G	2016-02-01	Project successfully completed

Once in the individual project, you will see a page with general information used to describe the project. The following information needs to be entered to create the project:

- Commodity Expert Group
- Project leader Member State
- Member States Participating
- Crop group
- Crop name and EPPO code
- Extrapolation crops for residue
- Extrapolation crops for efficacy
- Pest name and EPPO code
- Field/Greenhouse/Indoor
- Project started on
- Expected date of completion
- Active substance
- Or non-chemical method
- Product name and/or product code
- Information on the MRL requirements
- Information on the efficacy requirements
- Link with other products
- Other active substances contained in the product

This information needs to be completed and saved in order to access and edit the other pages of the project.

To save the information, click on the button 'Save information' at the bottom of the page.

The number of the project or 'Project id' is then automatically allocated by EUMUDA.

Please save your data by clicking the button at the end of this page, to access and edit the other pages of the project

### New Project

[Save information](#)

A large part of the information of the general page will automatically appear in the list of projects. For confidentiality reasons the following information that will not appear is:

- Member States Participating
- Extrapolation crops for residue
- Expected date of completion
- Active substance
- Or non-chemical method
- Product name and/or product code
- Information on the MRL requirements
- Information on the efficacy requirements
- Link with other products
- Other active substances contained in the product

### Pop-up boxes

In individual projects (as well as in individual needs), for some fields you will see boxes popping-up when moving the mouse on the symbol 'i'. These pop-up boxes provide guidance for entering the information, or general information linked to the field.

### Creating a project

To create a project, you will need to fill the following fields:

#### Field 'Commodity Expert Group'

Select the name of your group in the drop-down menu.

#### Field 'Project leader Member State'

Select the Member State in the drop-down menu. The menu contains all EU Member States and EFTA countries (Norway, Switzerland, Iceland and Liechtenstein).

#### Field 'Member State participating'

One or several Member States can be mentioned in this field.

To enter information, start typing the name of the Member State. A menu will then appear automatically where you can search and select the Member State(s). The menu contains all EU Member States and EFTA countries (Norway, Switzerland, Iceland and Liechtenstein).

## Project n. 122

Commodity Expert Group: Hops

Project Leader Member State: Germany (DE)

Member States Participating: Belgium (BE)

Crop group: Bulgaria (BG), Germany (DE), Greece (EL), Hungary (HU), Luxembourg (LU)

Crop name and EPPO code ⓘ

To remove a Member State, click on the cross on the left top corner of the field containing the Member State.

Member States Participating: France (FR)

### Field 'Member States interested'

One or several Member States can be mentioned in this field.

To enter information, start typing the name of the Member State. A menu will then appear automatically where you can search and select the Member State(s). The menu contains all EU Member States and EFTA countries (Norway, Switzerland, Iceland and Liechtenstein).

### Field 'Crop group'

This field correspond to the EPPO non-taxonomic groups for crops. These crop groups are displayed in a drop-down menu.

To enter the information, select a crop sub-group among the parent groups 'Arable crops', 'Fruit crops', 'Vegetable crops', Herbs, spices and medicinal plants'.

The group 'Ornamentals' and 'Forestry' are still under construction by EPPO. For 'Ornamentals' and 'Forestry' groups, select 'No crop group defined'.

For example, for orange, select the sub-group 'Citrus fruit' in the parent group 'Fruit crops'.

For crops not belonging to any of the sub-group, select 'No crop group defined' ('No crop group defined' does not correspond to a sub-group).

For example, hops belong to the parent group 'Arable crops' but do not belong to any sub-group, so 'No crop group defined' must be selected.

### Field 'Crop name and EPPO code'

One or several crops can be mentioned in this field. The crop should be indicated at species level.

To enter information, start typing the crop latin name or common name or its EPPO code. A menu will then appear automatically where you can search and select the right name and code. The field is directly linked to EPPO global database.

Crop group: -- Select --

Crop name and EPPO code: 

- huml
- hop (HUMLU)**
- houblon (HUMLU)
- common hop (HUMLU)
- vigne du Nord (HUMLU)
- houblon commun (HUMLU)

Extrapolation crops for residue:

Extrapolation crops for efficacy:

For your convenience, below the field there is also a link to EPPO global database as shown below.

Crop name and EPPO code: 

- [EPPO Global data base](#)

### Field 'Extrapolation crops for residue'

One or several crops can be mentioned in this field. The crop should be indicated at species level. Start typing the crop latin name or common name or its EPPO code. A menu will then appear automatically where you can search and select the right name and code. The field is directly linked to EPPO global database.

To know which crop(s) can be used for extrapolation to the project crop(s), use the link to the EU guidance document SANCO 7525/VI/95 'Guidelines on comparability, extrapolation, group tolerances and data requirements for setting MRLs'. This link will directly give you access to table 3 on recommended extrapolations.

Extrapolation crops for residue:

Residue extrapolation guidance: [table 3 of guidance document SANCO 7525](#)

### Field 'Extrapolation crops for efficacy'

One or several crops can be mentioned in this field. The crop should be indicated at species level. To enter information, start typing the crop latin name or common name or its EPPO code. A menu will then appear automatically where you can search and select the right name and code. The field is directly linked to EPPO global database.

To know which crop(s) can be used for extrapolation to the project crop(s), use the link to the EPPO page on minor uses and extrapolation tables.

Residue extrapolation guidance: [table 3 of guidance document SANCO 7525](#)

Extrapolation crops for efficacy:

Efficacy extrapolation guidance: [EPPO Minor Use extrapolation](#)

You can then access to extrapolation tables for minor uses, scrolling down on the EPPO webpage. These tables provide rules for extrapolations by crop groups or pest groups on effectiveness and/or crop safety under the categories herbicides, fungicides, and insecticides/acaricides/nematicides/molluscicides.

An example is given below:

● **Extrapolation tables**

The extrapolation tables should be used in conjunction with EPPO Standard PP 1/257 Efficacy and crop safety extrapolations for minor uses. The tables provide detailed lists of acceptable extrapolations organized by crop groups or pest groups for regulatory authorities and applicants in the context of the registration of plant protection products for minor uses. It is important to ensure that expert judgment and regulatory experience are employed when using these tables. EPPO excludes liability as to the reliability of the information provided through these tables.

All extrapolations should be viewed on a case-by-case manner and expert judgment should always be applied when employing these tables.

If you wish to comment on any of the tables below, please contact the EPPO Secretariat directly at [hq@epppo.int](mailto:hq@epppo.int).

- **EPPO Standard PP1/257 - Efficacy and crop safety extrapolations for minor uses**
- **Crop group definitions (revised version of 2014 - still under development):** this document aims to list all crops that should be encompassed by the groups of crops in the tables developed so far.

**Herbicides**

Crop group	Table type	
Bulb vegetables ( <i>Allium</i> spp.)	<a href="#">Effectiveness</a>	<a href="#">Crop safety</a>
Bush fruits	<a href="#">Effectiveness</a>	<a href="#">Crop safety</a>
Flower bulbs and -tubers and bulb- and tuber flower crops	<a href="#">Effectiveness</a>	<a href="#">Crop safety</a>
Grass seed crops	<a href="#">Effectiveness</a>	<a href="#">Crop safety</a>
Peas and beans	<a href="#">Effectiveness</a>	<a href="#">Crop safety</a>
Pome fruit	<a href="#">Effectiveness</a>	<a href="#">Crop safety</a>
Spring cereals including dry-seeded rice	<a href="#">Effectiveness</a>	-
Stone fruit	<a href="#">Effectiveness</a>	<a href="#">Crop safety</a>
Tree nuts	<a href="#">Effectiveness</a>	<a href="#">Crop safety</a>
Umbelliferous crops	<a href="#">Effectiveness</a>	<a href="#">Crop safety</a>
Vegetable brassicas	<a href="#">Effectiveness</a>	<a href="#">Crop safety</a>

When the minor use is not covered by the EPPO extrapolation tables, you can contact the MUCF at [contact@minoruses.eu](mailto:contact@minoruses.eu).

Field ‘Pest name and EPPO code’

One or several pests can be mentioned in this field. The pest should be indicated at species level. Start typing the pest latin name or common name or its EPPO code. A menu will then appear automatically where you can search and select the right name and code. The field is directly linked to EPPO global database.

Pest name and EPPO code 

Field / Greenhouse / Indoor 

Project started on

- Pauropsylla gossypii (PAURGO)
- Psylloptera quercina (PHYXQN)
- Psylliodes attenuata (PSYIAT)**
- Psylliodes convexior (PSYICO)
- Psylliodes hyoscyami (PSYIHY)
- Psylliodes tenebrosa (PSYITE)

### Field 'Field/greenhouse/indoor'

Select 'Outdoor or field use', 'Greenhouse application', 'Indoor application' in the menu. For multiple selections hold ctrl or shift (or drag with the mouse). There is a pop-up box explaining how to make multiple selections.

Field / Greenhouse / Indoor 

- Outdoor or field use
- Greenhouse application
- Indoor application

### Field 'Project started on'

Start typing the year, a menu will then automatically appear in a calendar where you can select the date. You can also enter the date under this format: yyyy-mm-dd.

Today

### Field 'Expected date of completion'

Start typing the year, a menu will then automatically appear in a calendar where you can select the date. You can also enter the date under this format: yyyy-mm-dd.

### Field 'Active substance'

Only **one** active substance should be mentioned in this field.

To enter the information, start typing the name of the active substance. A menu will then appear automatically, where you can search and select the right name. The field is linked to the EU pesticide database to have the most actual status of the active substance.

Active substance

Or non-chemical method 

Product name and / or product code

Is MRL required ? 

Has MRL been set for the project crop ?

Is efficacy needed ?  Yes  No

- Cyanazine
- Cyanides: calcium, hydrogen, sodium
- Cyantraniliprole**
- Cyazofamid
- Cyclanilide
- Cyclanilprole

### Field ‘Or non-chemical method’

This field corresponds to alternative methods to chemical pesticides, based on agronomic techniques, or physical, mechanical or biological pest control methods. This field refers to solutions that are not covered by Regulation (EC) No. 1107/2009. Biological control methods covered by Regulation (EC) No. 1107/2009, including semiochemicals, micro-organisms and botanicals should be listed under active substance.

Enter information by typing free text, in English.

### Field ‘Product name and/or product code’

Enter information by typing free text, in English.

A series of questions follow. These questions allow to provide more information on what the project consists of as regards residue and efficacy trials, and other products and active substances:

- Is MRL required?
- Has MRL been set for the project crop?
- Is efficacy needed?
- Are there other products linked?
- Does the product contain other active substances?

Is MRL required?  Yes  No

Has MRL been set for the project crop?  Yes  No

Is efficacy needed?  Yes  No

Are there other products linked?  Yes  No

Does the product contains other active substances?  Yes  No

Save information

### Field ‘is MRL required?’

An MRL is not required when i) an MRL has already been set for the crop or crop group ii) the active substance is exempted from MRL setting according to guidance document SANCO/11188/2012 (and included in Annex IV of Regulation (EC) No 396/2005) or it is a non-chemical method. There is a pop-up box displaying this information.

Tick ‘Yes’ or ‘No’.

### Field ‘Has MRL been set for the project crop?’

Tick ‘Yes’ or ‘No’.

### Field ‘Is efficacy needed?’

Tick ‘Yes’ or ‘No’.

### Field ‘Are there other products linked?’

Other products, containing the same active substance, could be linked to the project e.g. when data on these products is available.

Tick ‘Yes’ or ‘No’.

#### Field ‘Does the product contains other active substances?’

The product could contain other active substances. When residue data is needed on the other active substances, another project should be introduced or in case it already exists canbe linked to this project.

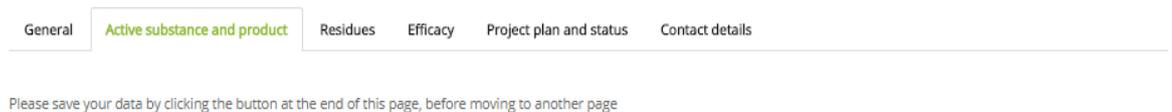

Tick ‘Yes’ or ‘No’.

**Do not forget to save information by clicking on the button ‘Save information’.**

#### 4.2.5 How to fill a project?

Once you have filled and saved the general page, you can access to the other pages of the project and add and modify information on these pages:

- a. Active substance and product
- b. Residues
- c. Efficacy
- d. Project plan and status
- e. Contact details

##### **a. Page ‘Active substance and product’**

This page contains information on the active substance and product, and if relevant on other products linked (containing the same active substance) and information on Good Agriculture Practices (GAP).

Information on the product needs to be entered and saved to be able to access to the part on the GAP.

- **Active substance and product**

## Active substance

### Flonicamid (IKI-220)

Expiry date	Status	(Last update of active substances database : 2017-11-20)
2020-08-31	Approved	

## Product

Product name and / or product code	Teppeki
Authorisation existing in Member States	× Germany (DE) ×
Regulatory zones	-- Select one or several zones-- Northern zone Central zone Southern zone
Formulation	WG - Water dispersible
Function	IN - insecticide
Active substance content	500.00
Active substance unit	g/kg

### Fields on active substance

These fields mention the expiry date and status of the active substance (approved, pending or non-approved). It also indicates the date when the last update from the active substance database took place.

They are automatically filled by EUMUDA from the general page, where the active substance has been indicated, and are linked to the EU Pesticide database.

### Field 'product name and/or product code'

This is the same field as in the general page of the project. Enter information by typing free text.

### Field 'Authorisation existing in Member States'

One or several Member States can be mentioned in this field.

Start typing the name of the Member State. A menu will then appear automatically where you can search and select the Member State. The menu contains all EU Member States and EFTA countries (Norway, Switzerland, Iceland and Liechtenstein).

Once you have entered the name of a Member State, you can repeat the same procedure for other Member States.

To remove a Member State, click on the cross on the left top corner of the field containing the Member State.

Authorisation existing in Member States	× Austria (AT) ×
---	------------------

### Field 'Regulatory zones'

Select one or several zones 'Northern zone', 'Central zone' or 'Southern zone' or 'all EU zones' in the menu. For multiple selections hold ctrl or shift (or drag with the mouse). There is a pop-up box explaining how to make multiple selections.

### Field 'Formulation'

Select one formulation type in the menu. The menu contains the product formulation types listed in PPPAMS.

### Field 'Function'

Select one function in the menu. The menu contains the product functions listed in PPPAMS.

### Field 'Active substance content'

Type the number corresponding to the content of the active substance in the product.

### Field 'Active substance unit'

This field is to inform on the unit of the active substance content in the product.  
Select one unit in the menu. The menu contains the units listed in PPPAMS.

### Field 'Comments on active substance and product'

Enter information by typing free text, in English.

- **Other products linked**

This part appears only when you have ticked the field 'Are there other products linked' in the general page of the project.

To add a linked product, click on the button 'Link a new product'.

#### Other products linked

Name of the product	Active substance content	Active substance content unit	Product application rate	Product application rate unit	
Verimark					<input type="button" value="Edit"/>
Benevia					<input type="button" value="Edit"/>

You will then see a box with various fields to be filled: 'Name of the product', 'Active substance content', 'Active substance Unit', 'Product application rate' and 'Product application rate unit'.

### Fields ‘Product name’ and ‘Substance name’

These fields are automatically filled from the general page by EUMUDA

### Field ‘Active substance content’

Type the number corresponding to the content of the active substance in the product.

### Field ‘Active substance unit’

This field is to inform on the unit of the active substance content in the product. Select one unit in the menu. The menu contains the units listed in PPPAMS.

### Field ‘product application rate’

Type the number corresponding to the application rate of the product.

### Field ‘product application rate unit’

This field is to inform on the unit of the application rate of the product. Select one unit in the menu. The menu contains the units listed in PPPAMS.

**To save the information, do not forget to click on the button ‘Submit’.**

- **GAP information**

#### GAP

### Field ‘Is GAP within the risk envelope?’

This information is to know if the conditions of use of the product tested in the trials in the project differ from the existing GAP.

Tick ‘Yes’ or ‘No’.

### Field 'For which aspect?'

This field is to inform on which aspect of the risk envelope the GAP is or is not within the risk envelope: toxicology, residues and dietary risk assessment, environmental fate and behaviour and ecotoxicology. Select one or several of these aspects of the risk assessment in the menu. For multiple selections hold ctrl or shift (or drag with the mouse). There is a pop-up box explaining how to make multiple selections.

### **GAP table**

Fields considered useful for the projects have been selected from PPPAMS. These fields are identical to the fields in PPPAMS. For all fields, there is a pop-up box explaining to what it corresponds and what type of information should be entered.

The GAP table to be entered on this page should be the GAP intended for authorisation of the plant protection product.

#### GAP TABLE

Remarks ⓘ

### Field 'Method/kind'

This field informs on how the product is applied. It is possible to select both a method and a kind. To enter information, select one method or/and a kind in the menu, e.g. spreading, between the plant. The menu contains the methods and kinds listed in PPPAMS. For multiple selections hold ctrl or shift (or drag with the mouse).

### Field 'Timing/growth stage of crop and season'

This field informs on when the product is applied during the crop growth and season. The growth stage ranges from first to last treatment and is indicated according to BBCH scale.

The BBCH scale can be found in the BBCH Monograph, Growth stages of Plants, 1997, Blackwell, ISBN 3-8263-3152-4.

Details about specific time(s), period, first and last treatment, e.g. autumn or spring pre-or post-emergence, at sufficient pest density or begin of infection, including restrictions (e.g. not during flowering) should be made in the remarks field.

The BBCH scale is also used in PPPAMS.

Select a BBCH scale for the first treatment in the menu of the field 'between' and for the last treatment in the menu of the field 'and'.

#### Field 'Max No per use'

This field corresponds to the maximum number of applications of the product per growing season used for the named crop/pest combination possible under practical conditions of use.

A numeric value (integer) should be typed.

#### Field 'Max No per crop/season'

This field corresponds to the proposed maximum number in the crop including applications on all pests/targets on the same crop in a growing season. It should be clearly indicated whether the displayed number of applications is per season, per crop cycle or per pest generation in the remarks field.

A numeric value (integer) should be typed.

#### Field 'Min interval between applications'

This field informs on the minimum interval (in days) between applications of the same product.

A numeric value should be typed.

#### Field 'Max. app. rate per prod'

This field provides the (maximum) product rate per treatment (usually kg or L product/ha). For specific uses, other specifications might be possible, e.g.: g/m<sup>3</sup> in case of fumigation of empty rooms or pallox (=big box used for storage potatoes, fruits, roots).

A numeric value should be typed.

#### Field 'Scale'

This field is the scale of the previous field 'Max.app.rate per prod'. A numeric value should be typed.

For example, 50 000 mL per ha could be expressed as 5x10<sup>4</sup>. In this case in the scale field the number '4' would be input and the number 5 would be input in the field 'Max.app.rate per prod'. For very small numbers a minus figure can be added. E.g. 0.0005 would be 5x10<sup>-4</sup>. In this case '-4' would be added to the scale field. Default value is 0 if scale is not used.

#### Field 'Unit'

The field unit corresponds to the value entered in 'Max.app. rate per prod'.

Select a unit in the drop-down menu.

If units are missing in the menu, you can contact the MUCF at [contact@minoruses.eu](mailto:contact@minoruses.eu).

#### Field 'Max. total rate per prod per crop/season'

This field provides the maximum product rate per growing season (especially if limited) or per crop cycle.

A numeric value should be typed.

#### Field 'Scale'

This field is the scale of the previous field 'Max total rate per prod per crop/season'. A numeric value should be typed.

For example, 50 000 mL per ha could be expressed as  $5 \times 10^4$ . In this case in the scale field the number '4' would be input and the number 5 would be input in the field 'Max.app.rate per prod'. For very small numbers a minus figure can be added. E.g. 0.0005 would be  $5 \times 10^{-4}$ . In this case '-4' would be added to the scale field. Default value is 0 if scale is not used.

#### Field 'Unit'

The field unit corresponds to the value entered in 'Max total rate per prod per crop/season'.

Select a unit in the drop-down menu.

#### Field 'Max. app. rate per AS'

This field provides the (maximum) active substance (AS) rate per treatment (usually g of AS/ha). For specific uses, other specifications might be possible, e.g.:  $\text{g/m}^3$  in case of fumigation of empty rooms or pallox (=big box used for storage potatoes, fruits, roots).

A numeric value should be typed.

#### Field 'Scale'

This field is the scale of the previous field 'Max.app.rate per AS'. A numeric value should be typed.

For example, 50 000 mL per ha could be expressed as  $5 \times 10^4$ . In this case in the scale field the number '4' would be input and the number 5 would be input in the field 'Max.app.rate per prod'. For very small numbers a minus figure can be added. E.g. 0.0005 would be  $5 \times 10^{-4}$ . In this case '-4' would be added to the scale field. Default value is 0 if scale is not used.

#### Field 'Unit'

The field unit corresponds to the value entered in 'Max.app. rate per AS'.

Select a unit in the drop-down menu.

#### Field 'Max. total rate per AS per crop/season'

This field provides the maximum AS rate per growing season (especially if limited) or per crop cycle.

A numeric value should be typed.

#### Field 'Scale'

This field is the scale of the previous field 'Max. total rate per AS per crop/season'. A numeric value should be typed.

For example, 50 000 mL per ha could be expressed as  $5 \times 10^4$ . In this case in the scale field the number '4' would be input and the number 5 would be input in the field 'Max.app.rate per prod'. For very small numbers a minus figure can be added. E.g. 0.0005 would be  $5 \times 10^{-4}$ . In this case '-4' would be added to the scale field. Default value is 0 if scale is not used.

#### Field 'Unit'

The field unit corresponds to the value entered in 'Max. total rate per AS per crop/season'.

Select a unit in the drop-down menu.

#### Field 'Min. water volume'

This field provides information of the minimum water volume applied during one application, in L/ha.

A numeric value should be typed.

Field 'Max. water volume'

This field provides information of the maximum water volume applied during one application, in L/ha. A numeric value should be typed.

Field 'Dependent upon development stage of crop?'

If water volume range depends on application equipment (e.g. ULVA or LVA), the field 'Yes' should be ticked.

Field 'Seed treatment'

When the product is applied as seed treatment, the field 'Yes' should be ticked and seed density completed in the next field.

Field 'Seed density'

The field density is given in kg/ha. Type a numeric value.

Field 'PHI (days)'

This field corresponds to the minimum pre-harvest interval and is given in days. To enter information, type a numeric value. When there is no PHI defined (due to MRL exemption), type '0'.

Field 'Remarks'

In this field, a text statement can be used to define a particular situation, add crop qualifiers or give further information about the use. The text should be in English.

**Do not forget to save information by clicking on the button 'Save information'.**

**b. Page 'Residues'**

This page provides information on the MRLs (Maximum Residue Levels) of the 'project substance', extrapolation crops and residue trials.

## MRLs (Maximum Residue Levels)

MRL Comments :

## MRLs (Maximum Residue Levels)

### Project substance

The name of the active substance is automatically filled by EUMUDA from the general page of the project.

#### Field 'Residue definition'

The residue definition can be found in the EFSA conclusion regarding the peer review of the active substance, in the list of endpoints (chapter: Residues in or on treated products food and feed). The residue definition for risk assessment should be used. The EFSA conclusions can be downloaded using the link below the field. The search on this website can be done by entering: 'EFSA conclusion' and the name of the active substance. There is a pop-up box providing this information. (Currently it is not yet possible to display the residue definition automatically from the EFSA-conclusion).

The name of the residue(s) should be typed.

### Project crop

The name of the project crop is automatically filled by EUMUDA from the general page of the project.

#### Field 'Availability Metabolism data'

This field provides information on the different crop groups for which metabolism data is available. Select a crop group in the menu.

### Fields 'EU MRL'

The EU MRL for the project crop can be found using the link to the EU pesticide residues database. A numeric value should be typed.

### Fields 'Codex MR', 'US MRL', 'JAP MRL', 'CAN MRL' and 'RUS MRL'

These fields correspond to MRL that may be available at Codex level or major non-EU countries: USA, Japan, Canada and Russia.

A numeric value should be typed.

### Field 'MRL Comments'

Enter information by typing free text, in English.

## **Extrapolation crops according to residue**

This information is filled automatically by EUMUDA from the general page.

## **Residue trials**

### Residue trials

#### 1. Residue trials required

Number of trials required for greenhouse / indoor 

#### 2. Residue trials available

<a href="#">+ Add a new available trial</a>							

#### 3. Residue trials still needed

Number of trials still needed for greenhouse / indoor 

#### 4. Ongoing residue trials

Ref	Crop	Company/Institute	Member State	GEP / GLP	Field Starting Date	Analytical Expected End Date	Remarks	Actions
<a href="#">+ Add a new ongoing trial</a>								

### Residue Comments

## **Residue trials required**

The number of trials required is according to the data requirements as laid down in Part A to Regulation (EU) No 283/2013 (active substance) and Part A to Regulation (EU) No 284/2013 (plant protection product). Guidelines on comparability, extrapolation, group tolerances and data requirements for setting MRLs are provided by Guidance Document SANCO 7525/VI/95, Rev. 10.2 or later.

The fields on the number of trials required depend on the conditions of use (greenhouse/indoor or field) and are automatically indicated by EUMUDA from the general page.

For each field, there is a pop-up box providing this information.

The number of trials required is not automatically calculated and should be entered manually by the project leader.

Field ‘Number of trials required for greenhouse/indoor’

### Residue trials

### Residue trials

---

#### 1. Residue trials required

Number of trials required in NEU zone ⓘ

Number of trials required in SEU zone ⓘ

Select a number from 0 to 8 in the menus.

### Residue trials available

There are several columns to be filled to describe each trial: Reference, Crop, Company/Institute, Country, GEP/GLP, Date of final report, Remarks and Actions.

Residue trials from non-EU Member States (including other regions of the world) can be accepted depending on the conditions use of the product in the trial. This is why the term ‘Country’ is used for available trials instead of ‘Member State’.

## 2. Residue trials available

Ref	Crop	Company/institute	Country	GEP / GLP	Date of final report	Remarks	Actions
<a href="#">+ Add a new available trial</a>							

Click on the button 'Add a new available trial'. A box will then appear where you can fill the individual fields of the columns mentioned above, and additional fields corresponding to: the area of use, trial type, product, application rate, unit, then Institute/Organisation, Country and GEP/GLP (for field and analytical parts).

When the trial becomes available i.e. when the date is (before) the current date, the trial will automatically be moved to the part '1. Available efficacy trials' of the same page.

**Do not forget to save the information by clicking on the button 'Submit'.**

### **Efficacy Comments**

#### Field 'General comments on efficacy and efficacy trials for this project'

Type free text, in English.

### **Phytotoxicity**

There are a few questions to be answered before filling information on the phytotoxicity trials, in order to know if phytotoxicity trials are required and estimate how many:

- Has the product fungicidal or insecticidal activity?
- Has the product herbicidal activity?
- Is the herbicide activity specific?
- Have adverse effects been observed in efficacy trials?

For each question, tick 'Yes' or 'No'.

### **Phytotoxicity trials**

The fields on the number of trials required depend on the conditions of use (greenhouse/indoor or field) and are automatically indicated by EUMUDA from the general page.

The number of trials required can be found in the EPPO Standard PP1/226 on the Efficacy evaluation of plant protection products. You can access to this Standard in the section ‘Efficacy trials’ of the tab ‘Efficacy’.

For uses in greenhouse of indoor conditions, there is one EU single zone according to Regulation (EC) No 1107/2009.

For uses in field conditions, trials must be performed in EPPO climatic zones: Mediterranean, Maritime, North and South-East zones. The choice of the zone depends on the Member States where authorisation of the product is sought.

The number of trials required is not automatically calculated and should be entered manually by the project leader.

The part on phytotoxicity trials has identical fields as the part on efficacy trials.

To fill the fields for phytotoxicity trials (trials required, available, still needed and ongoing), please use the instructions given for efficacy trials.

### Phytotoxicity Comments

Field ‘General comments on phytotoxicity and phytotoxicity trials for this project’

Type free text, in English.

**Do not forget to save the information by clicking on the button ‘Save information’.**

## Project plan

The aim of the project plan is to provide some basic information on the minor use need, the possible solution, the project, the project leader and parties involved, and to clarify the role of the parties participating /involved in this project. Most fields will automatically be filled by completing a project in EUMUDA. Description of who is responsible for which part of the project (e.g. field phase, analytical phase, quality assurance, number of trials) should be attributed ‘manually’ by the project leader to the ‘project members’.

- Downloading the project plan

The project plan can be generated directly in word format from the project pages (general, active substances and product, residues and contact details).

The project members can download the project plan in word format by clicking on ‘You can download project plan here, filled with EUMUDA information’.

### Project plan and status

## Project status and comments

This part provides information on the project status and general comments on the project.

The possible entries for ‘Status’ and some associated explanation are given in the table below (it is also provided in part 4.1).

Possible entries for ‘Status’	Explanation
Project started	

Project not started by MUCF or CEG	Because there is insufficient information provided
Project ongoing	Data generation
Project terminated before completion	
Project successfully completed	All data available

#### Field 'Project status'

Select one status in the menu. When there is an update on the status, select the appropriate new entry.

#### Field 'CEG comments'

Type free text, in English.

**Do not forget to save the information by clicking on the button 'Save information'.**

#### **e. Page 'Contact details'**

This page provides information on the Member State leading the project and the project leader, and other stakeholders involved in the project: participating Member States, authorisation holders (companies), grower's associations, research institutes and laboratories.

All of them are project members, with the exception of the laboratories, although they contribute to the generation of data. The contact details of laboratories are mentioned for convenience of the project members.

The MUCF manages and maintains a list of contacts covering the different type of stakeholders. The project leader is able to add and modify contacts of this list. New information can be checked and corrected by the MUCF.

If some contacts are missing, contact the MUCF at [contact@minoruses.eu](mailto:contact@minoruses.eu).

[Go back to the project Contact details](#)

[+ Add a new participating Member State contact](#)

A page will then appear where you can see a list of menus to be filled: User type, Civility, First name, Last name, Position, Email, Telephone, Mobile, Institute/Organisation, Dept/Unit, Address, Complementary address, ZIP code, City, Country code.

The star symbol indicates that the field should be filled mandatory.

## Add a new contact

★ Required

User type	Governmental Representative	▼	★
Civility	Ms	▼	★
First name			★
Last name			★
Position			
E-mail			★
Telephone			
Mobile			
Institute/Organisation	Private user (not a company)	▼	★
		<a href="#">+ Add or modify institute / organisation</a>	
Dept / Unit			

### All fields

Type or select the information in each field. For the field 'Country', the menu is for both EU and non-EU countries.

The position of the person corresponds to her/his job title.

The telephone number of the person must be typed with country code and 0 in brackets, before the regional number. For example, for France: +33 1 45 20 77 94.

**Do not forget to save the information by clicking on the button 'Save information'.**

To add and correct names of organisations, click on the button 'Add or modify institute/organisation'.

A page will then appear where you can see a list of institutes/ organisations, associated with their type and contact persons. It is possible to make searches in the field on the top left corner, and this search matches any column.

The list is given by alphabetical order of the names of the organisations.

Add a new institute / organisation

This is the same box as the one described above for adding or modifying Member States contacts. The same instructions can be followed to fill these fields.

**Do not forget to save the information by clicking on the button ‘Save information’.**

### Authorisation holder

There are several columns to be filled or considered to provide the contact details of each person. The columns and the fields are the same as for participating Member States. Please use the instructions given for participating Member States to provide the information.

## Grower's associations

There are several columns to be filled or considered to provide the contact details of each person. The columns, and the fields and lists of institutes/organisation behind are the same as for participating Member States. Please use the instructions given for participating Member States to provide the information.

## Research institutes

There are several columns to be filled or considered to provide the contact details of each person. The columns and the fields and lists of institutes/organisation behind are the same as for participating Member States. Please use the instructions given for participating Member States to provide the information.

## Laboratories

There are several columns to be filled or considered to provide the contact details of each person. The columns and the fields and lists of institutes/organisation behind are the same as for participating Member States. Please use the instructions given for participating Member States to provide the information.

### 4.2.6 How to copy a project?

To minimize the amount of work, it is possible for a project leader to copy a project from an original project.

To copy a project, go on the list of projects. Then go on the line of the original project to be copied and on the column 'Project id'.

Click on the second icon next to the project number:

Project id	CEG	Leading MS	Crop name and EPPO code	Crop Group	Extrapolation crops	Pest name and EPPO code	Area of use (FGI)	Date	Status
122	Hops	Germany	Hop (HUMLU Humulus lupulus)			OTIOLU Otiormynchus ligustici PSYIAT Psylliodes attenuata	F	2016-04-26	
123	Fruits and Vegetables	Germany	Strawberry (FRAAN Fragaria x ananassa)	Small fruit		CHTSFR Chaetosiphon fragaefolii MACSFR Sitobion fragariae MYZUAS Myzus ascalonicus APHIRB Aphis ruborum	G	2016-02-01	Project successfully completed
125	Fruits and Vegetables	Netherlands	Black currant (RIBNI Ribes nigrum) Red and white currants (RIBRU Ribes rubrum) Raspberry (RUBID Rubus idaeus) Bilberry (VACMY Vaccinium myrtillus)	Small fruit		DROSSP Drosophila sp. THRITB Thrips tabaci	F G	2014-02-17	
127	Hops	Germany	Hop (HUMLU Humulus lupulus)			POAAN Poa annua	F	2017-03-29	
128	Fruits and Vegetables	United Kingdom	Carrot (DAUCS Daucus carota subsp. sativus)	Umbelliferous vegetables	Z00155 other root and tuber vegetables except carrot	CAVAAE Cavariella aegopodii MYZUPE Myzus persicae BICTCR Bactericera trigonica	F	2016-01-14	Project ongoing

You will see a new page, where you can select the information would you like to copy from the original project by ticking boxes.

If you tick all boxes, your new project will contain the same information as in the original project.

**Do not forget to save the information by clicking on the button ‘Copy project’.**

### copy this project n. 122

If you tick all boxes, your new project will contain the same information as in the original project

#### General information

Check all / Uncheck all

Please note that project leader contact will be automatically copied from one project to the other

- Commodity Expert Group
- Project Leader Member State
- Member States Interested
- Member States Participating
- Crop group
- Project crop name and EPPO code
- Extrapolation crops for residue
- Extrapolation crops for efficacy
- Project pest name and EPPO code
- Field / Greenhouse / Indoor
- Project started on
- Expected date of completion
- Is MRL required ?
- Has MRL been set for the project crop ?
- Is efficacy needed ?
- Project status

- General comments on the project

### Active substance and product

- Check all / Uncheck all

- Active substance
- Or non-chemical method
- Product name and / or product code
- Are there other products linked ?
- Does the product contains other active substances ?
- Gap table (can be copied only if project product and substance are copied also)

### Residues

- Check all / Uncheck all

Residue trials (available and ongoing) don't need to be copied - they will appear automatically in the project if the database contains already the Residue trials (substance / crop)

- Number of residue trials required in NEU zone
- Number of residue trials required in SEU zone
- Number of residue trials required (if greenhouse or indoor project)
- Number of residue trials needed in NEU zone
- Number of residue trials needed in SEU zone
- Number of residue trials needed (if greenhouse or indoor project)
- Residue comments

### Efficacy

- Check all / Uncheck all

Efficacy trials (available and ongoing) don't need to be copied - they will appear automatically in the project if the database contains already the efficacy trials (substance / crop)

- Number of efficacy trials required in Mediterranean zone
- Number of efficacy trials required in Maritime zone
- Number of efficacy trials required in North zone
- Number of efficacy trials required in South East zone
- Number of efficacy trials required (if greenhouse or indoor project)
- Number of efficacy trials needed in Mediterranean zone
- Number of efficacy trials needed in Maritime zone
- Number of efficacy trials needed in North zone
- Number of efficacy trials needed in South East zone
- Number of efficacy trials needed (if greenhouse or indoor project)
- Efficacy comments

## Phytotoxicity

Check all / Uncheck all

- Fungicidal or insecticidal activity
- Herbicidal activity
- Herbicide activity specific
- Adverse effects been observed in efficacy trials

Phytotoxicity trials (available and ongoing) don't need to be copied - they will appear automatically in the project if the database contains already the phytotoxicity trials (substance / crop)

- Number of phytotoxicity trials required in Mediterranean zone
- Number of phytotoxicity trials required in Maritime zone
- Number of phytotoxicity trials required in North zone

- Number of phytotoxicity trials required in South East zone
- Number of phytotoxicity trials required (if greenhouse or indoor project)
- Number of phytotoxicity trials needed in Mediterranean zone
- Number of phytotoxicity trials needed in Maritime zone
- Number of phytotoxicity trials needed in North zone
- Number of phytotoxicity trials needed in South East zone
- Number of phytotoxicity trials needed (if greenhouse or indoor project)
- Phytotoxicity comments

#### Contact details

- Check all / Uncheck all
  - Participating Member States
  - Authorization holders
  - Grower's associations
  - Research institutes
  - Laboratories

Once you have saved the information and copied the project, a number is allocated to the copied project.

## 5. Table of crop acreages

### 5.1 What is the table of crop acreages?

The table of crop acreages of EUMUDA is a list of surfaces of crops at national level in the EU. It includes minor and major crops.

The surfaces are given in hectares (ha) and the information is primarily sourced from Eurostat.

In each line, the crop is described by the crop (common) name, scientific crop name, EPPO code, Crop group (EPPO non-taxonomic group), total acreage, outdoor acreage, greenhouse acreage.

There is also a column for comments.

Similarly as in the other parts of EUMUDA (table of needs and projects), the crop is preferably defined at species level, and EPPO codes are used.

Sometimes the crop information from Eurostat or Member States is on groups so the species name and EPPO codes cannot be indicated, and groups do not always correspond to EPPO crop groups.

The symbol ‘-’ is present when no name, EPPO code or EPPO crop group is available.

### National Crops Acreages (including minor and major)

Excel Print Search:

Crop name	Scientific crop name	EPPO code	Crop Group	Crop comments	Total acreage (ha)	Outdoor acreage (ha)	Greenhouse acreage (ha)	Year	Member State	Source
	Trifolium	1TRFG			2770.00	0.00		2017	Spain	Member State
	Hedysarum coronarium	HESCO			80.00	0.00		2017	Spain	Member State
	Onobrychis viciifolia	ONBVI			17645.00	0.00		2017	Spain	Member State
alfalfa	Medicago sativa	MEDSA			256950.00			2015	Spain	eurostat
alfalfa	Medicago sativa	MEDSA						2015	Portugal	eurostat
alfalfa	Medicago sativa	MEDSA			0.00			2015	Sweden	eurostat
alfalfa	Medicago sativa	MEDSA			0.00			2015	Malta	eurostat
alfalfa	Medicago sativa	MEDSA			670410.00			2015	Italy	eurostat
alfalfa	Medicago sativa	MEDSA						2015	France	eurostat
alfalfa	Medicago sativa	MEDSA			14030.00			2015	Greece	eurostat
alfalfa	Medicago sativa	MEDSA			200.00			2015	Cyprus	eurostat

The table below displays the description, source of information and possible entries where relevant, for the columns:

Column	Description	Source of information	Possible entries
Crop name	common name of crop species or group, in English	Eurostat, EPPO global database, MS	-
Scientific crop name	Scientific name of crop species, in latin	EPPO global database	-
EPPO code	EPPO code of crop, at species level	EPPO global database	-
Crop group	EPPO non-taxonomic group	EPPO global database	-
Crop comments	Any relevant comment (e.g. non-taxonomic EPPO crop name and code, organic production, seed production, amendment on the acreage)	MS	Free text
Total acreage (ha)	Total surface of the crop (outdoor and greenhouse conditions), in hectares (ha)	Eurostat or MS	Number starting from 0.00
Outdoor acreage (ha)	Surface of the crop in outdoor or field conditions, in hectares (ha)	Eurostat or MS	Number starting from 0.00
Greenhouse acreage (ha)	Surface of the crop in greenhouse	Eurostat or MS	Number starting from 0.00

	conditions, in hectares (ha)		
Year	Year of declaration of the surface	Eurostat or MS	Year (yyyy)
Member State	Member State concerned by the crop acreage	Eurostat or MS	Name of the 28 EU Member States
Source	Source of the information	Eurostat or MS	-

## 5.2 How to search in the table of crop acreages?

It is possible to make searches in the table using the field 'search' on a specific filter or combining filters. For example, a search can be done for the crop code, country and year at the same time (FRAAN Belgium 2015).

The information can be sorted by ascending or descending order. You can apply sorting on several columns by pressing the upper key, while clicking the top of the columns to be sorted.

You can get the total acreages among countries displayed by scrolling down to the bottom of the results. Please make sure that all results are displayed in the same page to obtain the correct total acreages. If not, select the 'all' entries in the 'show' box at the bottom of the page.

### National Crops Acreages (including minor and major)

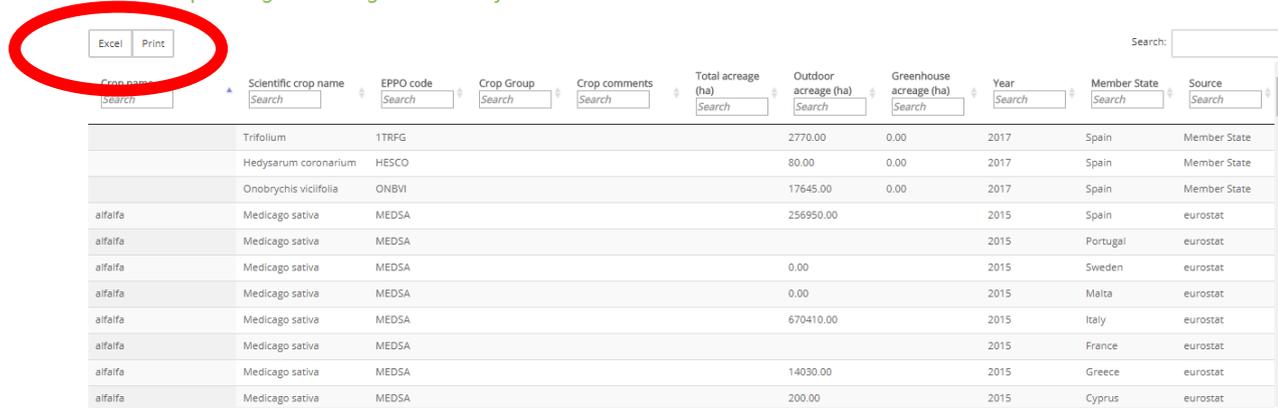

Crop name	Scientific crop name	EPPO code	Crop Group	Crop comments	Total acreage (ha)	Year	Member State	Source

### 5.3 Who can add and modify information?

Only the users 'National Minor Uses Contact Points', CEG (co) Chairs and the MUCF can add and modify national crop acreages.

The National Minor Uses Contact points are representatives of Member States governments and responsible for minor uses nationally. There are at least two contact points per Member States. They can add and modify information only for their own Member State.

The CEG (co)-Chairs can add and modify information only for their own CEG. CEG (co)-Chairs are not from industry.

### 5.4 How to add and modify information?

To add or modify national crop acreages, the users should contact the MUCF at [contact@minoruses.eu](mailto:contact@minoruses.eu). In the near future, it will be possible for the users to directly add and modify information through their login account.
